

# To achieve municipal success in this province, MNL is asking Federal Election candidates, and leaders, to commit to the following:

Increase water and wastewater funding directly available to municipalities. Specific focus needs to be on funding wastewater system treatment solutions in Newfoundland and Labrador.

Increase municipal fiscal stability through new revenue sharing tools that ease the reliance of municipalities on property taxes to balance budgets.

Continue direct support to municipalities to help address the housing crisis through programs such as the Housing Accelerator Fund, so that they can increase their capacity to respond to housing needs in the province.

Provide ongoing and additional support to municipalities in Newfoundland and Labrador to reach compliance with the Wastewater Systems Effluent Regulations (WSER).

Review the regulatory regime for the CRTC as it relates to cell phone service providers and increase funding available to support improved cell phone coverage in Newfoundland and Labrador.

Continue support available to municipalities for climate adaptation and mitigation, including natural infrastructure solutions.

Change the Federal Income Tax Act to make volunteer councillor remuneration tax exempt.

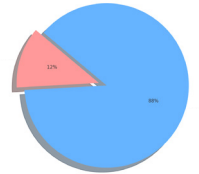

Support regional economic development in Newfoundland and Labrador that is driven by local entrepreneurs.

Increase, rather than decrease, RCMP community policing.

**Municipalities are central to the functioning of our country**

**and yet only 8-12 cents of every tax dollar goes to municipalities**

Municipalities, and municipal leaders, in Newfoundland and Labrador should be set up to succeed, not to fail, because too much is at stake.

**Municipalities**  
Newfoundland and Labrador
